NET Error - Initialization Error I have a project written in VB6. The project was working fine till yesterday (still it's on 24/03/2011). The same code was running without any issue till yesterday, but after that it gives error while opening the project. Please check the screenshot below to know more about the error: Please anyone help me to resolve the issue. I am using Visual Studio 2008, and VB 6. Thanks in advance. A: As described in this article, the error has been fixed in version 3.90. Download the.zip file from the download site and decompress it to a temporary folder. Run the "ElsaWin.exe" located in the temporary folder. I'm doing a great big shout out to the all great team at Charlie Mayers. There is currently a partial fix to your problem as I'm certain you can download a zipped solution if you head over to the official download page and download the latest Beta of ElsaWin which should solve your issue. I'd like to add that on the Beta site you can download the source code for 3.90 and 3.91 as well. I also faced this error and fixed it by uninstalling all the versions from uninstall section and then downloading the latest version. The hearing was held the same day Mayor John Tory was scheduled to give a speech that many critics said would be a veiled attack on Rob Ford's government. He was also to be grilled by a former Ford staffer, a current city employee and two councillors about whether he's trying to block the mayor's office from releasing his secret video. Scarborough-Rouge Park Councillor Mike Del Grande (Ward 17, Scarborough Rouge Park) threatened to go to court to release the recordings. Coun. Del Grande said council was "deeply concerned" about Ford's behaviour and if he didn't release the tapes, then a conflict of interest case could be taken against him. "We need to know what he was doing while he was the mayor of Toronto," Del Grande said. "It is council's responsibility to ensure that municipal employees are not being shielded from the view of the public. It's a simple matter of being open and transparent." In a later interview with CP24, he said he believed Ford "s 82157476af
