So, I'm extremely bored and since I always run into posts asking for CC recs I'm making a list of mine, I prefer maxis-match cc (that is, that matches the style of the game, and isn't photo-skinned textures) and go for high-quality content, I've been downloading cc since TS2 came out and have never had any issue with any of my games (at least not any that involved cc, I'm looking at you TS3).
